ARMEZON[®] HERBICIDE APPROVED FOR USE ON FLAX

BASF is pleased to announce Armezon herbicide is now registered for post-emergent applications to flax. This use was registered under the User Requested Minor Use Label Expansion program.

Armezon herbicide is an innovative Group 27, post-emergent herbicide that is quickly absorbed by leaves, roots, and shoots to quickly control target weeds.

Armezon herbicide can be applied to flax at 40 acres per jug (15 mL/acre) and requires the addition of Merge[®] or Assist[®] adjuvant and 28% UAN. There are no pesticide tank mixes approved for use in flax (DO NOT apply Armezon to flax in combination with any other pesticide or injury may result).

Armezon herbicide can be applied when flax is 5 – 10 cm. Armezon should be applied when broadleaf weeds are 1 to 6 leaf and grass weeds are 1 to 4 leaf.

For full product information, please reference the Armezon herbicide label. You can also contact your local BASF **AgSolutions**[®] Grower, Retail or Technical Services Representative or call **AgSolutions** Customer Care at 1-877-371-BASF (2273).

Always read and follow label directions.
